

The Linealux L5 Generation 2 is a high-power, architectural grade luminaire that combines technology and performance in a stylish linear form factor. Packed with features including **EasyGlow™** visual comfort **CoolDrive™** thermal management technologies and **MicroAntileach™**. **PowerSync™** allows for highly granular digital control via common protocols. Unique and flexible optics allow wide end-to-end spacing whilst maintaining excellent uniformity. Designer lens options are offered as standard to provide superb color-over-angle consistency and blending of colors even at close blending distances. Available in white, color-changing and tunable white light engines.

Luminaire Gap

We define the Gap being where the luminaire ends to where the start of the next luminaire. To be able to create the gap, cable length is added to the input connector side. A minimum gap of 0.4" (10 mm) must be applied to cope with thermal expansion.

Network Topology – Line Voltage 220-240 Vac, 120/277 Vac Dimmable and Color-Changing via PowerSync4®

Up to 45 luminaires per run under the following conditions:

- Max total cable run length 492 ft (150 m) in up to two trunk cables.
- For run lengths in excess of 100 ft (30 m), the data wire gauge cannot exceed 14 AWG (2.5 mm²).
- For run lengths up to 100 ft (30 m), the data wire gauge is not governed.
- Refer to 'Maximum Circuit Load' table for circuit limitations.
- Always observe local electrical codes for branch circuit current limitations.

Refer to PowerSync™ installation instructions for maximum distance information and topology options.
All connectorized options in North America are limited to 12.8A branch circuit load.
Above circuit loading limits are based on maximum circuit current capacity and PowerSync™ control capacity. Cumulative earth leakage and voltage drop may need to be calculated.
For non-continuous runs contact factory for details.
Local wiring rules and requirements may limit circuit loadings refer to relevant electrical parameters to calculate.

- Terminator**
Use PowerSync™ terminator, supplied with leader cable to terminate last luminaire in chain.
- Maximum Current**
Maximum current through cables and connectors supplied by Lumascape:
≤12.8 A - Installations in North American Market (UL, ETL)
≤16 A - Installations in International Market (CE, CCC)
- Connection Type**
Circuits can be configured as either connectorized or hardwired. For details refer to installation instructions and comply with local electrical codes.

Connectorized Accessories – Line Voltage 220-240 Vac

Leader Cables – PowerSync Line Voltage 220-240 Vac (For Connection Type 73 or 77 Only)

4-core 1.5 mm² or 2.5mm² for use in CE/CCC installations. Compatible with all luminaires with Type 73 or 77 connectorized supply cable options. Supplied fitted with an IP68 connector for pairing with the first connectorized luminaire in a Powersync4, Line Voltage circuit. Comes complete with a matching End of Circuit, Powersync4, Line Voltage, Terminator Plug.

PowerSync Line Voltage 220-240 Vac, 120/277 Vac Data Injector

Combines the convenience of standard wiring methods to translate control signals into a digital format that can be transmitted over standard copper wire. This allows highly granular addressing and high-speed digital control of every luminaire, using only four wires and accepts a growing list of standard protocols (0-10V, DMX / RDM), for simple integration with a wide selection of control systems using these industry standard protocols.
